LOCALLY BUILT TO YOUR REQUIREMENTS

# WHY CHOOSE US? THE $\mathcal{O}$ SteelChief <br> SMALL SHEDS. BIG IDEAS 

## STEELCHIIEF - GREAT VALUE \& GREAT ADVANTAGES!

1. All of our products are locally made in Ballarat and Sydney to your requirements.
2. SteelChief sheds are a great DIY product - all shed panels are pre-assembled making your installation simple and safe.
3. Select your SteelChief product size and colour then select any of our additional optional extras. Decide on door type and positioning then build your shed exactly the way you want it. Delivery of your product will usually be within two weeks in panel form with rolled safety edges on all sheets ensuring you an excellent finished project with the minimum installation effort.

## GUARANTEE

SteelChief guarantees all workmanship of our products. Our current suppliers of pre-painted coloured and zinc sheeting have warranted that their products are resistant to flaking peeling and excessive fade or perforation for 15 years under certain conditions. The warranties are given subject to our suppliers' standard warranty terms which can be found online via BlueScopes warranties calculator. We will pass on to our suppliers any material warranty claim but SteelChief will not itself be liable to meet any such claim. SteelChief may without notice change suppliers and/or materials which may alter warranty terms.

## IMPORTANT NOTE

- If in doubt about the suitability of a SteelChief product for your site please consult your local civil engineer.
- Prices are current from 1st September 2021. This recommended price list replaces all other SteelChief pricing information and is subject to change without notice.
- All sizes shown are actual external wall dimensions. Roofs will overhang the walls in some directions. All measurements stated by SteelChief are nominal (or approximate) and may vary slightly from product to product. Please advise your distributor of any important dimensional requirements.
- SteelChief products are not watertight. For improved water resistance we recommend a rebated concrete floor or our rebated wooden floor option.

## at Steelchief we LIke TO Keep things simple with easy diy

That's why all of our products come in pre-assembled panels so if you are the Do-lt-Yourself kind of person upon delivery of your new SteelChief product all you need to do is screw the panels together using a cordless drill. Be sure to attach your product to the ground immediately to ensure no wind damage occurs. Instructions on assembly can be obtained from your nearest distributor or just visit us at www.steelchief.com.au to download a full step-by-step guide.

## COLOUR

At SteelChief we let you be as creative with colour as you like.
Mix and match any of our 10 colours for walls, door, roof and windows.
Please note: the colours below and in the example pictures are approximate shades only and should not be used for colour matching. Visit your distributor to view actual colour samples.

| Ironstone | Monolith/ Monument | Mist Green / Pale Eucalypt | Slate Grey / Woodland Grey | Windspray | Shale Grey | Dune | Merino/Paper Bark | Smooth Cream/ Classic Cream | Off White/ Surfmist | Zinc |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |  |  |  |  |  |

## HIGHER WIND LOADINGS!

All SteelChief sheds are engineered to windclass N4
(Subject to correct installation of the shed)

## STEELCHIEF - INSTALLATION

Available in all major cities and some regional areas. Check with our team regarding availability Installation by the SteelChief team includes attaching the shed to the ground with star pickets, or to your flat concrete slab with anchors and clips.

Direct To Ground Flooring Example.
(Only suitable for wind protected areas.
Not N4 rated.)

Direct To Flat Slab Example.

## OPTIONAL SITE PREPARATION

As well as offering help when it comes to the installation of your new SteelChief product, we can also organise site preparation to ensure everything goes smoothly when we put your product up. Request a quote and we'll come and see you to survey your area. Site preparation may include minor excavation and/or retaining walls.

Setting up a site so that it's level and suitable for a concrete slab, wooden floor or direct to ground installation requires more work that
you might first think. You must use an accurate level to check the grades on your site. Also consider how water will drain around your shed. If your shed is larger than 10 m 2 Victoria, 15 m 2 South Australia, it may need a permit. You can check with your local council or just ask us and we can find out for you, and then obtain the permit on your behalf. For a full list of steps to ensure a prepared site just go to our website www.steelchief.com.au.

## CONCRETE FLOORS

Unless you have some concreting experience, or a qualified friend who does, we do not recommend doing the concreting yourself. A mistake made can often be very expensive, and difficult to rectify. Let the Steel Chief team take the hassle out and do it for you, and also lay any other surrounding pathways etc.

## REBATED CONCRETE SLAB (MAXIMISES WATER TIGHTNESS\}

Concrete floors are a great shed base option. Allow the concrete to dry for forty-eight hours before using the shed! The finished slab size is the same size as the shed, but upon request additional concreting around the shed can be done.

- Concrete and shed installation completed same day
- Suitable for relatively flat sites

## FLAT CONCRETE SLAB

The shed is bolted to the flat slab. In this option you may want to seal around the base of the shed. We will pour the slab and return at a later date to erect the shed. If you require us to seal the base of the shed please request a quote. Note: The silicone seal around the shed base is usually good but in some circumstances it can leak water.

- Suitable for flat and sites with a fall
- Sheds can be sealed internally with silicon type bead
- Bolt shed to slab using concrete clips
- Slab poured then shed installed at a later date

## INFILL POUR SLAB

- Concrete flows inside ribs and voids sheet warranty

Premature corrosion may occur

- Damaged shed usually requires concrete floor to be removed and replaced. Very expensive.
- Loss of 65 m m headroom

## Yes we can do custom sizes and shanes!

10. Doors and windows are positioned in the middle of the panels. 3.76 m panels are made up with two 1.8 m panels. Customer to specity door panel.
11. Verandah depth 680 mm .

## Picture T7:

Side: $2.45 \mathrm{~m} \times$ skillion 1.84 m .
\$2785
Customer to specify roof colour.

## Yes we can do custom sizes and shanes!

## TIMBER CUBBY HOUSES

## THE HUT

The Hut is our original design and our most popular cubby style. Designed to look like a traditional house, The Hut features a gable roof and a verandah. The Hut can be styled to suit different themes - a shop, a police station, a post office, a house. Just add any of our colourful features and accessories and you can create your own magical space. To include an adventure playground element, why not consider adding an elevation, a sheltered sandpit, slides, scramble nets and a rock wall. The Hut is available in three sizes.

Height 2.11 m
Large - \$3,229
*Optional extras not included in price.

As Pictured: Small Hut with door, two windows and a verandah in the gable and one window in the side.

## THE BEACH SHACK

The Beach Shack is the smallest cubby in our range and is designed with smaller backyards and courtyards in mind. With no verandah, this cubby can be transformed into anything. Add a café servery and turn the shack into an imaginary shop front. Continue along this theme by decorating the shack with a couple of flower boxes and let your child's imagination run wild. Although compact, the shack's multiple windows enhance a feeling of spaciousness inside. The Beach Shack is available in two sizes. Depending on your space, you can also add a sheltered sandpit.

Height 2.0 m
Medium - $\$ 2,379$

As Standard: Door and two windows in the gable, one window in the side. As Pictured: Small Beach Shack with optional* 0.45 m elevation kit.

## THE FORT

The Fort is a wonderful outdoor play centre the whole family can enjoy. You can choose to install the fort on the ground or add an elevation, which will open up endless adventure possibilities. Once an elevation is included you can look at adding features such as a slide, a scramble net, a rock wall, a fireman's pole, a sandpit. This playground will keep your children entertained for days. The fort is available in two different sizes. It's completely open design allows you to always see your children playing inside.

As Pictured: Large Fort with an access opening in the center of each wall.

## ELEVATION KITS

|  | Elevation | Beach Shack The Hut | Small Fort | Large Fort |
| :--- | :--- | :--- | :--- | :--- |
| Above Ground | 1.2 m Kit |  | $\$ 939$ | $\$ 755$ |
| In Ground | 0.45 m Kit | $\$ 415$ | $\$ 499$ | $\$ 385$ |
|  | 1.2 m Kit |  | $\$ 559$ | $\$ 605$ |

Inground Elevations: Posts are 0.6 m longer so they can be dug into the ground and concreted in place. Posts can be trimmed to height to suit uneven ground. Above Ground Elevations: Includes sandpit boards which form bracing support for posts. No need to dig posts into ground.

ACCESSORIES

PRE-PRIMED
Upgrade to pre-primed weather boards add $26 \%$ to the cubby price. Must be painted within a couple of weeks after delivery.

$\$ 65$ SHIPSTEERNG WHEEL $\$ 65$
D HANDLE

## PAGE 19

General: Playgrounds should be installed on flat stable ground. Allow 2 metres space from solid structures to ensure safe use. Cubby verandah or Fort openings need to be filled with options or balustrades if elevated. Suitable under surfacing is required as per Australian Standard AS 4685:2014 recommendations. Adult supervision and guidance is required for children using these products.

## Yes we can do custom sizes and shapes!

## DOG PENS

SINGLE PENS: 1 DOOR

| SHED SIZE |  |  |  |  | RUN LENGTH | ZINC | COLOUR |

| $1.58 \mathrm{~m} \times 1.8 \mathrm{~m}$ high | With 1 door | $\$ 495$ |

Add single door to any panel $\$ 189$

## RURAL ELEVATED DOG KENNELS

These are high quality dog enclosures designed for the rural industry. Solid welded construction of frames using a non- rust weld technique, solid snappy latch, welded wire mesh and heavy duty sheeting. Sheeting is a mixture of offcuts and new sheets from our shed operations. Minor dents or scratches won't affect longevity of your kennel. Can be supplied as fully erected (fork on / off your tray) or as pre-assembled panels ready to screw together. Easy installation on your farm. Particleboard 19 mm flooring in the kennel, treated pine decking in the run. Doors both ends.

DOUBLE
$2.40 \mathrm{~m} \times 1.58 \mathrm{~m} \times 1.40 \mathrm{~m}$ high. \$2,933

## DIY WOODEN FLOORING SYSTEM - CHEAPER \& EASIER THAN REBATED CONCRETE!

This flooring system is simple fast great value and easy to relocate. A rebated wooden floor offers excellent water seal at the base of the shed and strong attachment to the ground.

| Side/Gable | 0.81 | 1.58 | 2.35 | 3.12 | 3.89 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Front 0.81 | $\$ 149$ | $\$ 215$ | $\$ 275$ | $\$ 379$ | $\$ 445$ |
| 1.58 | $\$ 215$ | $\$ 369$ | $\$ 455$ | $\$ 575$ | $\$ 685$ |
| 2.35 | $\$ 275$ | $\$ 455$ | $\$ 589$ | $\$ 745$ | $\$ 879$ |
| 3.12 | $\$ 379$ | $\$ 585$ | $\$ 799$ | $\$ 989$ |  |
| 3.89 | $\$ 455$ | $\$ 709$ | $\$ 989$ |  |  |

Whilst the wooden floors are simple and effective we do not have engineering specifications and computations for them and as such they are not suitable for cases where a permit is required.
Supplied as pre cut sheets of 19 mm particle board flooring and $70 \times 45 \mathrm{~mm}$ treated pine bearers cut to length. Simply lay bearers onto the prepared (flat) site and screw or nail down flooring. Erect shed onto bearers so floor is rebated inside your shed. Then attach your shed to bearers through the Basesmart.
